## ABSTRACT

Islamic education plays a crucial role in shaping the character of a young generation with noble morals and responsibility. Islamic values teach ethics, morality, and the discipline necessary to face challenges. life. Study This aim for analyze as far as where education Islam contribute towards the formation of character student. Method study Which used is approach quantitative with method A survey of 25 vocational school students showed that 85% of respondents felt that Islamic education helped them they understand importance mark moral in life daily. Besides That, 78% student States that material PIE Which given in school contribute to formation attitude discipline and not quite enough they answered. With thus, education Islam can become foundation main in form character generation young people who are qualified and have good morals.

## Keywords

education islam, foundation character, generation young.

## INTRODUCTION

Education is pillar main in form character and civilization something nation. Through education, individual can get knowledge knowledge at a time build attitude and morality Which Good (Tiger et al., 2024). In context education Islam, objective main not only limited to print individual Which intelligent in a way intellectual, but also own personality that glorious in accordance with teachings Islam. Education Islam play a role in give understanding that deep about values Islam Which can applied in life everyday (Arlina et al., 2024). However, in era modern This, challenge in education the more complex. Globalization and progress technology give impact positive at a time negative for development moral generation young. Lots from they experience degradation moral consequence access Which No controlled to less educational information (Qisthi et al., 2024). Therefore, Islamic education is the solution for overcome problem This with give coaching moral and spiritual strong for students.

The Role of Islamic Education in Shaping Character Good character reflects individuals who are disciplined, honest, responsible, and caring towards others. Islam teach values This through various approach, like learning The Qur'an, hadith, and an understanding of noble morals. In addition, Islamic education instills values spiritual Which become base for participant educate in undergo life Which filled with challenge (Hamdi & Musthofa, 2021). Education Islam No only oriented on aspect cognitive, but Also aspect affective and psychomotor. Through this holistic approach, students are taught to understand the concept of morality. And apply it in life daily. With thus, they No only understand the concept of kindness, but also try to practice it in their social interactions (Mursyidi, 2020).

Method Learning in Education Islam in its implementation, education Islam uses various method learning Which effective For form character participant One frequently used method is the role model, where educators serve as concrete examples in implementing Islamic values (Zaim, 2020). This role model is crucial because participant educate tend copy behavior Teacher or person Which they respect. Another method applied in Islamic education is experience-based learning, in where participant educate invited for practice teachings Islam in life daily. For example, through activity social like share with fellow, mutual assistance mutual cooperation, and charity activities Which practice they for become individual Which care and responsible answer (Syuroyah et al., 2022). In addition, a discussion and reflection approach is also used to improve students' understanding of Islamic values. Through discussion, they can analyze various problem Which faced in life and look for solution Which in accordance with Islamic teachings (Ramadan et al., 2022). Reflection, in side other, help they in evaluate self and improve quality moral they.

Challenge in Implementation Education Islam Although education Islam While education has many benefits in shaping the character of the younger generation, its implementation is not without challenges. One of the main challenges is the lack of awareness of the importance of education. Islam in build character individual. Lots public Which more emphasize on aspect academic compared to coaching moral and spiritual (Mustaniruddin et al., 2021). Besides That, development technology Which rapidly Also become challenge alone. Young generation moment This more Lots use up time with gadget and media social, which often timeserve content Which contradictory with values Islam (Efissa Pratiwi, 2021). By because of that, need There is strategy Which appropriate in utilise technology as means learning which supports Islamic education.

Solutions to Optimize Islamic Education To overcome these challenges, it is necessary various step strategic in optimize education Islam. Wrong One One solution that can be implemented is to improve the quality of teaching staff (Susilawati et al., 2024). Educators must have a deep understanding of Islamic values and be able to teach them. with method Which interesting and relevant with life participant educate. Furthermore, the positive use of technology can also be an effective solution. Developing a digital-based learning platform containing Islamic educational materials can help students understand and practice Islamic teachings more easily. This way, they can remain connected to Islamic values even in the digital age (Novitri, 2024).

## METHODOLOGY

Study This use approach quantitative with method survey. Sample research consists of from 25 student Vocational School Which chosen in a way random. Instrument study covering questionnaire designed to measure students' understanding before and after receiving Islamic education in learning PIE. Besides That, observation done for see How student applying values Islam in life daily. Data Which obtained analyzed use technique statistics descriptive for evaluate effectiveness education Islam in form character student. Interview Also done with several Islamic Education teachers to get their perspectives on the challenges and strategies in teaching values Islam to student.

## RESULTS AND DISCUSSION

The results of the study show that Islamic education has a significant impact on formation character student. Based on data questionnaire Which obtained from respondents: 85% student feel that education Islam help they understand importance moral values in everyday life. This shows that the material taught in education Islam give runway Which strong in build awareness moral student. 78% of students stated that the Islamic Religious Education (PAI) material provided at school contributed to the development of their discipline and sense of responsibility. Thus, Islamic education not only equips them with religious knowledge but also shapes their character. habit life Which more orderly and responsible answer. 82% of students felt more motivated to apply Islamic values after receiving interactive, digital-based learning. This confirms that innovative learning methods utilizing technology can increase student interest in Islamic teachings. 75% of students admitted that they better appreciate and understand the importance of morals in interact with Friend and Teacher after follow eye lesson PIE. With say others, education Islam give impact real in form connection social Which more Good in the school environment. Further discussion shows that Islamic education combined with method learning innovative, like use media interactive And discussion groups, more effective in improving students' understanding of Islamic values. Media -based learning digital allows student For Study with more interactive and deep, so that they more easy absorb material Which delivered.

In addition, teachers also play a vital role in instilling character values by providing concrete examples in everyday life. Teachers who demonstrate discipline, honesty, and integrity are and full not quite enough answer will become example for participant educate. With existence guidance that Good from educators, student will more easy internalize values Islam in their lives.

Study This Also find that use media digital in learning religion has impact positive to involvement student. Student Which used to with technology feel more comfortable learning through videos, animations, and interactive applications that present Islamic material with method Which interesting. Matter This show that education Islam need adapt with development era so that still relevant for generation young. Besides That, environment school and family Also own influence big in Building student character. Schools that implement Islamic culture in daily life, such as practicing congregational prayer and prioritizing respect for teachers, can strengthen the internalization of Islamic values in selfstudent. In side other, family Which support and apply teachings Islam in life daily will help student in guard values moral Which they learn at school. Thus, the success of Islamic education in forming students' character is not only depends on method learning Which used, but also on role as well as various parties, including Teacher, school, And family. Synergy between third element This very important to create environment Which conducive for development moral And spiritual participant educate.

## CONCLUSION

Based on results study, can concluded that education Islam own the urgency that tall in form character generation young. Education Islam Which implemented with innovative methods proven to be able to increase students' understanding and motivation in internalizing values moral and ethics Islam. To increase the effectiveness of Islamic education, teachers are advised to make greater use of technology in process learning. Use media digital and method Interactive can help students more easily understand and apply Islamic teachings in everyday life.

Besides That, support from school, Teacher, and person old very required for ensure implementation education Islam walk with optimal. Collaboration between various party This will contribute in build public Which based on values Islam as well as creating a generation Which morals glorious and responsible answer.
